

## Acceptance of bagged malt, hops, yeast and detergents

Before signing the waybill by reception of the goods from the Seller's warehouse, the order composition and the packaging of the goods must be checked. The buyer must check the integrity of the package and refuse the loading of torn and damaged bags, packets, cans.

The expediter driver of the buyer or a transport company is fully responsible for the safety of the cargo after the signature of the waybill in the shipping warehouse.

In case of detection of defective products follow the instructions:

— note the actual quantity of goods (bags and packages) accepted for transportation in the waybill before signing the documents in the warehouse;

— if possible, take photos of damaged bags or packets;

— You can submit a claim by phone +7 495 7898941 or email us [info@grainrus.com](mailto:info@grainrus.com)

— Inform the warehouse workers about the required acceptance procedure.

## Acceptance of malt in bulk

To be sure of the quality of the received goods, follow the instructions:

— ask the driver for the quality certificate and declaration of conformity for the supplied batch of malt;

— inspect the condition of the trailer before unloading;

— insist on slow and even transportation of malt to silo;

— transport documents must not be signed until the malt is fully discharged and its quality is checked;

— be sure to note all discrepancies before the document of goods reception is signed by the recipient. The detected problems should be noted in the waybill;

— if you have questions about acceptance and unloading of the goods, call +7 495 789 89 43. The driver should wait if you have any questions about the delivery.

## Malt storage

The seller makes everything possible to ensure that there is no contamination or products of the pests life-activity in the goods. Once the malt is shipped from the warehouse, we cannot control the conditions.

Our recommendations for storing malt:

— inspect the storage area at regular intervals. This is of particular importance at storage temperatures above 18° C;

— store the malt in a clean, cool, ventilated dry premises, not on the floor and away from walls (except for silo walls);

— use periodic fumigation (if stored in large quantities);

— use malt within 3 months after reception for best results.

## Malt specifications

*Specifications and description of the goods are available at [www.malt.ru](http://www.malt.ru).*

The analysis of malt and hops may be sent on request to your e-mail or fax.

If any of the above is not clear to you or if you have any questions, please contact our managers.
